

WeSign

Secure, Simple and Efficient eSignature

Transform your document-based business processes with WeSign
E-Sign invoices, agreements, quotations, health statements, bank forms and more

Comda – Leading in strong authentication solutions and digital signing

Important:

Comsign (Comda) is an eIDAS QTSP (Qualified Trust Service Provider).

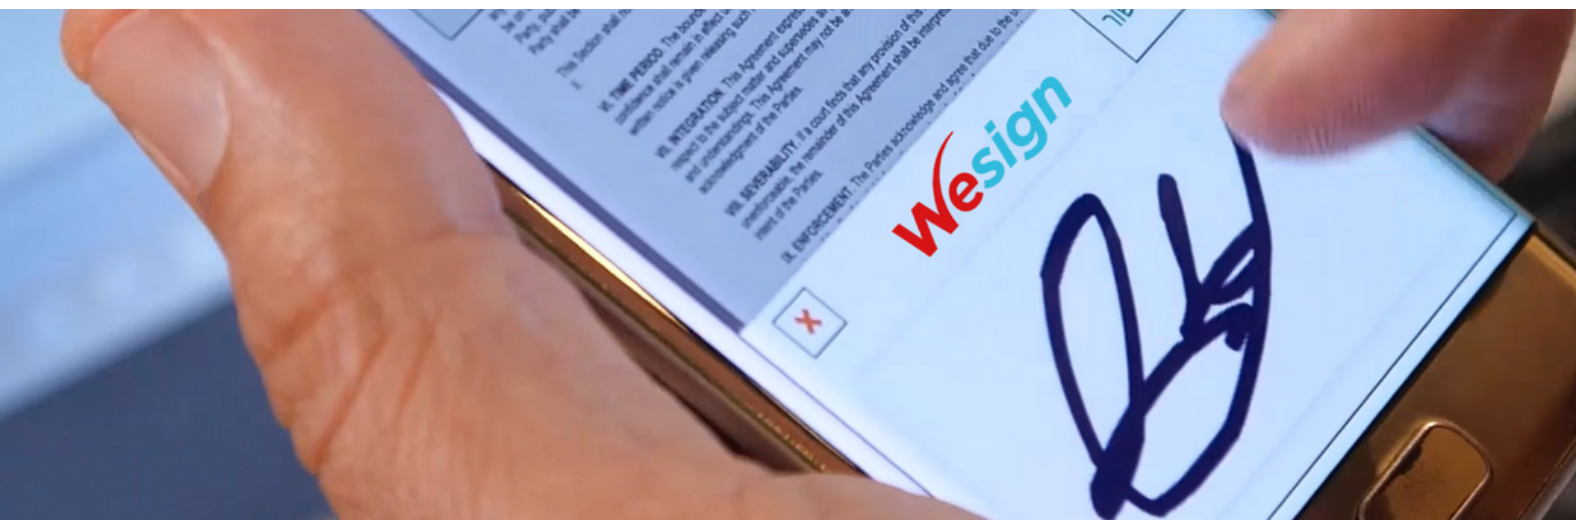

QTSPs are regulated (Qualified) to provide trusted digital certificates under the electronic Identification and Signature (eIDAS) regulation.

It's time to digitize your enterprise business processes with WeSign

People and organizations today may need both internal and external electronic signatures on agreements, quotations, health statements and bank forms. Many of them involve complex workflows requiring multiple approvals, like procurement, loans, internal compliance, payouts or corporate cash withdrawals.

They might also need to monitor, document and report the completion of every single piece of the process, empowering recipients and stakeholders to provide electronic signatures using any device (desktop, mobile or tablet) at any time, anywhere.

WeSign streamlines every approval, moving effortlessly between departments and sign-offs, getting to “done” faster

Cross-Platform

With WeSign, e Signing a document can be done anytime and using any device: mobile, tablet or desktop

Professional Support

Having some trouble uploading a document? Or perhaps assigning a recipient? Send us a message, and we'll gladly assist

Flexible Plans

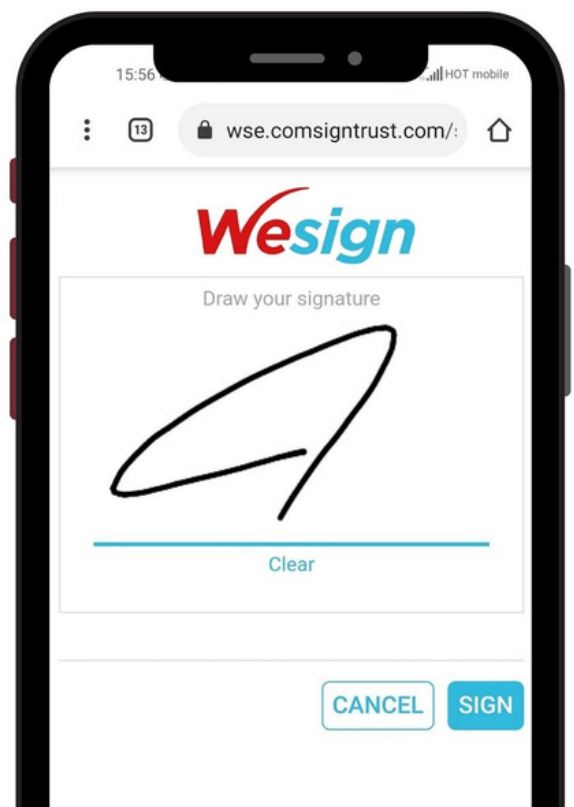

An individual? a company? With our flexible pricings, everyone will find the right plan which fits them best

One cloud, one love

As a cloud based platform, you shouldn't be worried about software installations or disk space (except your signed documents, of course!)

Highly Secured

Rest assured that our team takes all the necessary steps, in order to make you feel safe. Your data is encrypted, so all signed documents are visible only to you

WeSign Key Features:

- **Advanced security and privacy settings** - Add 2 factor authentication of your signer by sending a OTP to his mobile before logging in to sign a document
- **Audit trail** - Real-time tracking and monitoring. Track every stage of the signing process of a document
- **Multiple methods of sending documents to recipients** - SMS, email or with a link that can be sent on any messaging or social networking app like WhatsApp or Facebook.
- **Live online co-browsing** signature session between the sender and the signer with synchronized screens
- **Compatibility with most document file formats** including PDF, MS-Word, JPEG, PNG, XLS and CSV
- **Templates** - Reusable document templates and their custom fields
- **Attachments Adding and requesting** - Request additional documents from your signers as Attachments. Add Attachments to the document you send to your signers
- **Branding** - Add company's logo and custom message for your company
- **Signers can use their CA issued electronic signature** - Allow signers to e-sign documents using their digital certificate for electronic signing
- **Workflow** - Route documents between signers for Approval
- **Departments and teams** - Create different teams to share, create, sign and streamline workflows
- **API** - Create custom eSigning and workflows within your application with API capabilities
- **Send documents to be signed on corporate tablets** - Documents can also be sent to an organization's corporate tablets so customers or employees can enjoy easy access
